

EXECUTIVE MEMORANDUM | BRIGHTCHAMPS FOUNDER'S OFFICE

TO: Founder & CEO, BrightChamps

DATE: September 15, 2026

FROM: AI Forward Deployed Associate Candidate

SUBJECT: 14-Day Intervention to Plug Rs. 61.6L/Mo Demo No-Show Leak

1. The Core Bottleneck & Financial Sizing (The Rs. Number)

Analysis of 5,000 leads (June–July 2026) reveals BrightChamps converts only **7.24%** of top-of-funnel leads. The single largest financial leak is **Demo No-Shows: 36.20% of parents who schedule a demo fail to attend** (1,169 leads / 584.5 leads/mo). Benchmarked against attendee conversion (17.57%) and Rs. 60,000 AOV, **no-shows drain Rs. 61,62,786 per month** in gross revenue. Scheduling latency is toxic to attendance: join rates drop from **74.1% (<24h delay)** down to **43.5% (>48h delay)**.

2. The Selected Lever (Live in 9 Days, Zero Engineering Sprint)

Deploy an **Autonomous WhatsApp 'No-Show Concierge' & Smart Rescheduling Agent**. Triggered via CRM webhook 15 minutes after a missed demo, the AI sends a warm check-in in the parent's local timezone with 1-tap reschedule buttons. **Why this over alternatives:** A CRM routing overhaul requires a 6-week engineering sprint (rejected); increasing outbound calls worsens rep burnout since conversion drops to 0% after 7 attempts (rejected). Recovering just **20% of no-shows** recovers **117 attendees and +20.5 conversions/mo**, generating **+Rs. 12,32,550/month** against <Rs. 25,000 SaaS cost (**>4,800% ROI**).

3. Baseline Metrics to Register Day 1 vs Target Scorecard

Funnel Metric	Pre-Launch Baseline	30-Day Target	Financial Impact Sizing
Demo No-Show Rate	36.20% (1,169 / 3,229)	< 27.0% (-25% relative)	Reduces lost volume by 146 leads/mo
No-Show Reschedule Recovery	< 5.0% (manual call tag)	≥ 20.0% attended	+Rs. 12,32,550 / month net revenue lift
Scheduled-to-Conversion Rate	11.21%	≥ 13.00%	+29 total enrolled students / month
Safety Guardrail: Opt-out Rate	N/A	< 1.5%	Protects brand reputation & number health

4. Primary Adoption Risk & Operational Mitigation

The Risk: Rep Non-Compliance & Commission Paranoia. If reps fail to update demo status in real-time or view automated outreach as competition, triggers fail.

The Mitigation: 1) *Zero Added Effort:* Reps only mark 'No Show' in CRM as usual; 2) *Commission Ringfencing:* 100% of commissions on rebooked students remain credited to the original rep; 3) *Rep Champion:* Pilot with top reps AD-01 & AD-04 to prove it puts money in their pockets.

5. Completed Working Prototype & Source Code

- Live Interactive AI Agent:** Streamlit app running on <http://localhost:8501> (Visual Funnel Leak Sizing, ML Lead Scoring, Smart Follow-Up Generator, Rep Coaching Tracker).
- GitHub Repository:** <https://github.com/vaibhav2226cse-cmyk/BrightChamps-Sales-Funnel-AI-Agent>
- Tools Utilized:** Python, Pandas, Scikit-Learn, Plotly, Streamlit, ReportLab, GitHub CLI.
