

BRIGHTCHAMPS — FOUNDER'S OFFICE EXECUTIVE MEMORANDUM

TO: Founder & CEO, BrightChamps	DATE: September 15, 2026
FROM: AI Forward Deployed Associate Candidate	SUBJECT: 14-Day Intervention to Plug Rs. 61.6L/Mo Demo No-Show Leak

1. The Core Problem & Financial Sizing (The Revenue Number)

Analysis of 5,000 leads across June–July 2026 reveals BrightChamps converts only **7.24% of leads**, leaking Rs. 2.81 Cr every 60 days. The single costliest bottleneck is **Leak 2: Demo No-Shows**.

- **36.20% of parents who schedule a demo fail to attend** (1,169 missed demos across 60 days = **584.5 leads/month**).
- Sized at the baseline conversion rate of attendees (17.57%) and Rs. 60,000 package price, **demo no-shows bleed Rs. 61,62,786 / month** in gross revenue.
- **Root Cause: Scheduling latency and friction.** Attendance collapses from **74.1%** when scheduled within 24h to **43.5%** after 48h. Parents simply forget or encounter conflicts.

2. The Proposed Lever (Go-Live in < 10 Days, Zero Engineering Sprint)

We propose deploying an **Autonomous WhatsApp 'No-Show Concierge' & Instant Rescheduler**:

- **Mechanism:** Triggered via webhook 15 minutes after a missed demo. An AI concierge messages the parent via WhatsApp in their local timezone with an empathetic check-in and interactive one-tap rescheduling slots.
- **Why It Works:** Eliminates phone-tag friction, operates 24/7 across US, UK, and SEA timezones, and recaptures high-intent parents while motivation is fresh.
- **Financial Return:** Recovering just **20% of no-shows** adds **+117 attendees** and **+20.5 conversions/month**, delivering **+Rs. 12,32,550/month** in net gross revenue against a SaaS cost of <Rs. 25,000/month (**>4,800% ROI**).

3. Baseline Metrics to Register Before Day 1

Metric Name	60-Day Historical Baseline	Target Threshold (Day 14)
Demo No-Show Rate	36.20% (1,169 / 3,229 scheduled)	< 27.0% (25% relative reduction)
Post-No-Show Reschedule Rate	Estimated < 5.0% (manual phone calls)	≥ 20.0% attended reschedules
Demo Join Rate	63.80% of scheduled leads	> 73.0% of scheduled leads
Net Monthly Revenue Lift	Baseline (Rs. 0)	+Rs. 10,00,000 to +Rs. 12,00,000 / mo

4. How Success Will Be Measured (The Weekly Scorecard)

- **Primary Metric:** Demo No-Show Rate reduction from **36.2% to < 27.0%**.
- **Secondary Metric:** Automated Reschedule Conversion rate ≥ **20%** of contacted no-shows re-booking and attending.
- **Financial Metric:** Net New Monthly Gross Revenue of **+Rs. 10,00,000 to +Rs. 12,00,000 / month**.
- **Guardrail Metric:** WhatsApp opt-out / block rate maintained **< 1.5%** to safeguard brand reputation.

5. Biggest Adoption Risk & Concrete Mitigation Strategy

- **The Risk: Rep Resistance & Non-Compliance.** If sales reps fail to mark attendance in real-time or perceive the automated agent as 'stealing' their deals, the webhook trigger fails.
- **The Mitigation: (1) Zero Added Effort:** Rep changes nothing except ticking 'No Show' in CRM. **(2) Commission Protection:** 100% of the commission on recovered demos remains attributed to the assigned rep. The bot acts as the rep's personal 24/7 assistant, not a competitor. **(3) Executive Recognition:** Highlight top rep recoveries in weekly sales all-hands.

6. Project Deliverable Links

- **Interactive AI Agent Application:** Streamlit Dashboard (Home, Funnel Leak Analysis, Lead Scoring, Follow-Up Engine, Rep Performance)
- **GitHub Repository:** <https://github.com/vaibhav2226cse-cmyk/BrightChamps-Sales-Funnel-AI-Agent>
